

Lap Band and Losing Weight

Lap Band and Losing Weight

For those patients who have come to TopSurgeons, the success stories are endless.

Karen came to TopSurgeons looking for answers as her weight had eventually reached 300 pounds. She tried just about every traditional weight loss program on the market. For Karen, she was not getting the desired results. As Karen pointed out, losing the weight was not really a problem; it was losing the weight and keeping it off permanently.

Deciding to have Lap Band surgery was one of the best decisions Karen said she ever made. Since having Lap Band surgery, Karen has lost some 40 pounds and has managed to drop two dress sizes. She says she is closer to the day when she has just one comfortable dress size in her closet.
